PROFESSIONAL SUMMARY

Fresh Computer Science graduate and Flutter Developer with hands-on experience building cross-platform mobile applications. Skilled in Flutter, Dart, Clean Architecture, Bloc/Cubit state management, Firebase, and REST APIs. Familiar with CI/CD using Fastlane and Firebase App Distribution. Seeking a junior Flutter developer role to contribute to building scalable and production-ready mobile applications.

TECHNICAL SKILLS

Languages: Dart, C++, Python, HTML/CSS, SQL

Mobile Development: Flutter, Bloc (Cubit), Provider, Clean Architecture, MVVM Pattern, SOLID Principles, Repository Pattern, GoRouter, GetIt, Injectable, Retrofit, Dio, REST APIs

Backend & Cloud: Firebase (Firestore, Authentication, Firebase App Distribution), Supabase, FastAPI, N8N

Storage & Persistence: SharedPreferences, Flutter Secure Storage, Hive, SQLite

DevOps & Tools: Git, GitHub, CI/CD, Fastlane, Android Studio, VS Code, Figma, Adobe XD

Other: Localization, Animations, Deep Links, Google Maps.

WORK EXPERIENCE

Trainee Flutter Developer | Route IT Training Center

Sep 2023 – Apr 2024

Cairo, Egypt

- Delivered pixel-perfect UI for 5+ Flutter training projects, achieving full responsiveness across all target screen sizes using Flutter's widget-based architecture.
- Mastered Bloc and Provider state management across 3 projects, reducing UI rebuild overhead and keeping business logic fully separated from the presentation layer.
- Consumed 4+ RESTful APIs using Dio and third-party libraries, cutting data-fetching boilerplate by centralizing API calls in a shared service layer.
- Architected the Repository Pattern across all projects to decouple local and remote data sources, making each feature independently testable and maintainable.

PROJECTS

EmoVision – AI Facial Emotion Detection

June 2026

Flutter, Bloc (Cubit), Clean Architecture, Firebase, Supabase, FastAPI, Sentry, Retrofit, Dio, Fastlane

- Engineered a Flutter app that detects facial emotions in uploaded videos via a Scikit-learn and MediaPipe AI model served through a cloud-hosted FastAPI backend.
- Structured the codebase with Clean Architecture and a feature-based folder layout; leveraged Bloc/Cubit for state management and GetIt for dependency injection across all layers.
- Built the networking layer with Retrofit/Dio, adding a Dio interceptor for automatic Bearer token attachment.
- Configured automated CI/CD pipelines with Fastlane and Firebase App Distribution across separate development and production flavors, reducing manual release effort to zero.
- GitHub: github.com/khaledNat3y/emo-vision

AI Chat App

Dec 2025

Flutter, Bloc (Cubit), Clean Architecture, Firebase, Gemini API

- Built an AI-powered chat application with Flutter and Bloc/Cubit, wiring up Firebase Authentication and Firestore for real-time messaging across multiple users.

- Connected the Gemini API to power smart, AI-generated responses, cutting average reply latency by removing round-trips to a custom backend.
- GitHub: github.com/khaledNat3y/chat_app

Order Tracking App

Aug 2024

Flutter, Bloc (Cubit), Clean Architecture, Google Maps, Geolocator, Firebase Auth, Firebase Firestore

- Developed a real-time order tracking app with Cubit state management and a feature-based Clean Architecture structure, keeping each module independently scalable.
- Wired up Google Maps and Geolocator to render live order locations on-screen, backed by Firebase Authentication for secure login and Firestore for sub-second order data sync.
- GitHub: github.com/khaledNat3y/order_tracking_app

EliteMart – Dual E-Commerce Platform

Jan 2026

Flutter, Firebase, Supabase Storage, N8N, Bloc (Cubit), Clean Architecture

- Engineered a dual-app e-commerce platform (customer app + admin app) in Flutter with a feature-based folder structure, enabling both apps to share 0 code conflicts while scaling independently.
- Automated backend workflows with N8N — set up webhook triggers and email notification pipelines that fire on every order event, replacing what would have required manual backend code.
- GitHub: <https://github.com/khaledNat3y/e-commerce-elite-mart>

E-Commerce App (Styliq)

May 2025

Flutter, Bloc (Cubit), REST API, Flutter Secure Storage, Animations

- Developed end-to-end user authentication and cart management flows, consuming RESTful APIs via Bloc/Cubit — keeping all UI state predictable and business logic testable.
- Secured authentication tokens with Flutter Secure Storage and elevated the user experience with fluid animations and a fully responsive layout.
- GitHub: github.com/khaledNat3y/new-e-commerce-app

EDUCATION

Tiba Higher Institute

Oct 2022 – Jun 2026

Bachelor of Computer Science

Cairo, Egypt

Relevant Coursework:

Data Structures, Algorithms Analysis, Software Engineering, Database Management, Artificial Intelligence, Image Processing, Computer Architecture, Web Development, Compiler Design, Operating Systems

CERTIFICATIONS

Flutter Development Diploma

Apr 2024

Route IT Training Center – Cairo, Egypt
